EQUIPMENT SPEC SHEETS

Representative equipment specifications

Indicative specifications across clinical categories.
Final specifications are confirmed per project and per
manufacturer — we tailor selection to your workload,
budget and service needs.

SPECIFICATIONS

Diagnostic Imaging

Equipment	Indicative specification	Typical use
Diagnostic Ultrasound	Multi-probe, colour Doppler, portable & cart options	Cardiac, abdominal, OB/GYN, MSK
Digital Radiography (X-ray)	Flat-panel DR, high-frequency generator	General radiography
ECG Machine	3/6/12-channel, interpretive software	Resting & diagnostic ECG
Patient Monitor	Multi-parameter: ECG, SpO ₂ , NIBP, temp, resp	Ward, ICU, theatre

Specifications are indicative and vary by manufacturer and configuration. Contact us for a specification matched to your requirement.

SPECIFICATIONS

Laboratory

Equipment	Indicative specification	Typical use
Biochemistry Analyser	Throughput matched to workload, open/closed reagents	Clinical chemistry
Haematology Analyser	3-part / 5-part differential	CBC & haematology
Laboratory Centrifuge	Fixed & swing-out rotors, refrigerated options	Sample preparation
Autoclave / Steriliser	Class B/N steam sterilisation	Decontamination

Specifications are indicative and vary by manufacturer and configuration. Contact us for a specification matched to your requirement.

SPECIFICATIONS

ICU & Theatre

Equipment	Indicative specification	Typical use
ICU Ventilator	Invasive & non-invasive modes	Critical care
Defibrillator	Manual & AED, optional pacing	Resuscitation
Anaesthesia Workstation	Integrated ventilation & monitoring	Operating theatre
Operating Table	Multi-position, radiolucent options	General & specialty surgery

Specifications are indicative and vary by manufacturer and configuration. Contact us for a specification matched to your requirement.
